AUTHOR INDEX

Bailey, W. J.
Synthesis of Monomers that Expand on Polymerization, p. 142

Boe, N. W.
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Brewer, G. E. F.
Electrodeposition of Polymers, p. 2

Brinkmann, A. W.
Nylon 6/Graphite Fiber Composites by In Situ Polymerization, p. 153

Bruner, A. H.
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Byrne, P.
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Cacciotti, P. J., Jr.
Microcellular Urethanes in Automotive Exterior Parts, p. 74

Corbett, G. E.
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, p. 180

Dinbergs, K.
Thermoplastic Polyurethane Molecular Weight-Property Relations, p. 222

Frisch, H. L.
Nomenclature of Interpenetrating Polymer Networks, p. 196

Frisch, K. C.
Nomenclature of Interpenetrating Polymer Networks, p. 196

Klempner, D.
Nomenclature of Interpenetrating Polymer Networks, p. 196

Kresta, J.
Polyphenylene Oxides – The Oxidative Coupling Polymerization of 2,6 Dimethylphenol with $CuCl_2$ – Amine Complex, p. 20

Litt, M. H.
Nylon 6/Graphite Fiber Composites by In Situ Polymerization, p. 153

Malik, L.
Polyphenylene Oxides – The Oxidative Coupling Polymerization of 2,6 Dimethylphenol with $CuCl_2$ – Amine Complex, p. 20

Payne, A. R.
Mechanical Properties of High Density Cellular Urethanes, p. 161

Prikryl, R.
Polyphenylene Oxides – The Oxidative Coupling Polymerization of 2,6 Dimethylphenol with $CuCl_2$ – Amine Complex, p. 20

Schollenberger, C. S.
Thermoplastic Polyurethane Molecular Weight-Property Relations, p. 222

Spain, R. G.
High Temperature Composites with Graphite Fiber, p. 90

Tincher, W. C.
High Temperature Composites with Graphite Fiber, p. 90

Tkac, A.
Polyphenylene Oxides – The Oxidative Coupling Polymerization of 2,6 Dimethylphenol with $CuCl_2$ – Amine Complex, p. 20

Wadie, B. J.
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, p. 180

Wall, L. A.
Pyrolysis of Polymers, p. 36

Wells, S. C.
New Families of Polymers: Thermoplastic Elastomers, p. 102

Whittaker, R. E.
Mechanical Properties of High Density Cellular Urethanes, p. 161

Williams, D. J.
Morphology Considerations in Heterogeneous Latexes for Impact Polymers, p. 6

Wirtz, H.
Production of Urethane Soling Material, p. 131

SUBJECT INDEX

Anionic Polymerization
Nylon 6/Graphite Fiber Composites by In Situ Polymerization, p. 153

Butyl Grafted Polyethylene
New Families of Polymers: Thermoplastic Elastomers, p. 102

Caprolactone
Nylon 6/Graphite Fiber Composites by In Situ Polymerization, p. 153

Catalysts
Polyphenylene Oxides — The Oxidative Coupling Polymerization of 2,6 Dimethylphenol with $CuCl_2$ — Amine Complex, p. 20

Cationic Mechanism
Polyphenylene Oxides — The Oxidative Coupling Polymerization of 2,6 Dimethylphenol with $CuCl_2$ — Amine Complex, p. 20

Chemical Kinetics
Pyrolysis of Polymers, p. 36

Composites
High Temperature Composites with Graphite Fiber, p. 90

Composites
Nylon 6/Graphite Fiber Composites by In Situ Polymerization, p. 153

Copolyesters
New Families of Polymers: Thermoplastic Elastomers, p. 102

Crimping
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Crystalline Domains
Thermoplastic Polyurethane Molecular Weight-Property Relations, p. 222

Cut Growth
Mechanical Properties of High Density Cellular Urethanes, p. 161

Diffusion Effects
Pyrolysis of Polymers, p. 36

Dynamic Properties
Microcellular Urethanes in Automotive Exterior Parts, p. 74

Elastomers
New Families of Polymers: Thermoplastic Elastomers, p. 102

Elastomer Sheets
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, p. 180

Electrocoating Process
Electrodeposition of Polymers, p. 2

Electrodeposition
Electrodeposition of Polymers, p. 2

Expansion in Volume on Polymerization
Synthesis of Monomers that Expand on Polymerization, p. 142

Fatigue
Mechanical Properties of High Density Cellular Urethanes, p. 161

Filmformers
Electrodeposition of Polymers, p. 2

Foam Pressing Technique
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, p. 180

Foam Structure
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, p. 180

Free Radicals
Pyrolysis of Polymers, p. 36

Glass Transition Temperature
New Families of Polymers: Thermoplastic Elastomers, p. 102

Graphite Fiber
High Temperature Composites with Graphite Fiber, p. 90

Graphite Fiber
Nylon 6/Graphite Fiber Composites by In Situ Polymerization, p. 153

Hosiery
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Impact Polymers
M orphology Considerations in Heterogeneous Latexes for Impact Polymers, p. 6

Interpenetrating Polymer Networks
M orphology Considerations in Heterogeneous Latexes for Impact Polymers, p. 6

Interpenetrating Polymer Networks
Nomenclature of Interpenetrating Polymer Networks, p. 196

Latent Cocatalysts
Nylon 6/Graphite Fiber Composites by In Situ Polymerization, p. 153

Latex Particle Morphology
Morphology Considerations in Heterogeneous Latexes for Impact Polymers, p. 6

Microstructures
Nomenclature of Interpenetrating Polymer Networks, p. 196

Mix Heads
Microcellular Urethanes in Automotive Exterior Parts, p. 74

Molding Urethane Foams
Microcellular Urethanes in Automotive Exterior Parts, p. 74

Molecular Weight
Thermoplastic Polyurethane Molecular Weight-Property Relations, p. 222

Monomers that Expand on Polymerization
Synthesis of Monomers that Expand on Polymerization, p. 142

Nylon 6
Nylon 6/Graphite Fiber Composites by In Situ Polymerization, p. 153

Nylon-Urethane Biconstituent Fiber
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Painting
Electrodeposition of Polymers, p. 2

Paracrystalline Domains
Thermoplastic Polyurethane Molecular Weight-Property Relations, p. 222

"Phantom Leg" Tests
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Phenoxy Radicals
Polyphenylene Oxides – The Oxidative Coupling Polymerization of 2,6 Dimethylphenol with $CuCl_2$ – Amine Complex, p. 20

Physical Properties
Mechanical Properties of High Density Cellular Urethanes, p. 161

Polyblends
Nomenclature of Interpenetrating Polymer Networks, p. 196

Polyimides
High Temperature Composites with Graphite Fiber, p. 90

Polymerization with Expansion in Volume
Synthesis of Monomers that Expand on Polymerization, p. 142

Polymer Pyrolysis
Pyrolysis of Polymers, p. 36

Polyphenylene Oxides
Polyphenylene Oxides – The Oxidative Coupling Polymerization of 2,6 Dimethylphenol with $CuCl_2$ – Amine Complex, p. 20

Polyphosphates
High Temperature Composites with Graphite Fiber, p. 90

Polyurethane Elastomers
Mechanical Properties of High Density Cellular Urethanes, p. 161

Poromeric Materials
Mechanical Properties of High Density Cellular Urethanes, p. 161

Primary Polymer Chains
Thermoplastic Polyurethane Molecular Weight-Property Relations, p. 222

Reaction Injection Process
Microcellular Urethanes in Automotive Exterior Parts, p. 74

Ring Opening Polymerization
Synthesis of Monomers that Expand on Polymerization, p. 142

Seeded Styrene Emulsion Polymerization
Morphology Considerations in Heterogeneous Latexes for Impact Polymers, p. 6

Shoes
Production of Urethane Soling Materials, p. 131

Shrinkage During Polymerization by Cyclic Monomers
Synthesis of Monomers that Expand on Polymerization, p. 142

Single-Filament Testing
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Solvent Wash
Electrodeposition of Polymers, p. 2

Spandex
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Strength
Mechanical Properties of High Density Cellular Urethanes, p. 161

Stretch Nylon
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Styrene-Butadiene Copolymers
New Families of Polymers: Thermoplastic Elastomers, p. 102

Synthetic Trans-1,4 Polyisoprene
New Families of Polymers: Thermoplastic Elastomers, p. 102

Tensile Properties
Nylon 6/Graphite Fiber Composites by In Situ Polymerization, p. 153

Thermoplastic Urethane Elastomers
Thermoplastic Polyurethane Molecular Weight-Property Relations, p. 222

Urethane Foams
Microcellular Urethanes in Automotive Exterior Parts, p. 74

Urethanes
New Families of Polymers: Thermoplastic Elastomers, p. 102

Urethanes
Production of Urethane Soling Materials, p. 131

Vaporization
Pyrolysis of Polymers, p. 36

Yarn
Monvelle®: A New Nylon-Urethane Biconstituent Fiber, p. 201

Zero Shrinkage on Polymerization
Synthesis of Monomers that Expand on Polymerization, p. 142
